- **ONE PIECE OVERSIZED 30MM/34MM TUBES** increase strength and reliability, and provides greater elevation and windage adjustment for long ranges.
- **5X ZOOM** provides maximum range at the high end, wider field of view at the low end without any tunneling effect.
- **CONSISTENT EYE RELIEF** and a generous eye box throughout the magnification range eliminate the need to reposition eye when changing magnification.
- **TAPERED ALL METAL MAGNIFICATION RING** is angled so the shooter can see his magnification setting while positioned directly behind the scope.
- **LARGE, EASY-TO-GRIP WINDAGE, ELEVATION, PARALLAX AND ILLUMINATION KNOBS** for positive, non-slip adjustment of the diopter, reticle and parallax settings.
- **LOW PROFILE TURRETS, PARALLAX ADJUSTMENT AND ILLUMINATION CONTROLS** are less likely to hang up or snag during movement.
- **ILLUMINATED RETICLE** with 7 night/4 day levels. The “Off” position between all 11 settings completely disconnects the battery at each off position to prevent battery drain.

- **RESETTABLE TURRETS** with hard stops at zero for accurate dialing of elevation and windage.
- **SECOND ROTATION INDICATOR**, a Steiner exclusive that shows each mil of elevation through the indication window on the elevation turret. After the first revolution of 120 clicks, the mil numbers on the scale change automatically preventing the shooter from getting lost on the dial.
- **LOCKING DIOPTER** that prevents accidental rotation of the diopter.
- **WATERPROOF/FOGPROOF/SHOCKPROOF** durable construction you can trust to stand up to any cold or wet condition. Waterproof to depths of 33 feet and impact tested on all optical and electronic components.
- **DESIGNED TO ACCOMMODATE CUSTOM ACCESSORIES**
- **TENEBRAEX LENS COVERS** easily attach to a built-in lens cover adaptor.
- **THROW LEVER** that allows for easy rotation and quick adjustment of the magnification ring.
